

# Security Awareness Training

## 2022 STAT Pack with SafeTitan

# #1

Phishing is still the No. 1 attack vector in cybersecurity attacks.

# 37.9%

The average phishing susceptibility rate across all industries globally is 37.9%.

# 60%

Currently only 60% of MSPs offer SAT as part of their managed services offering.

The SAT market currently exceeds \$1 billion annually, and grows at a rate of 13% per year.

# 90%

Human error is accountable for 90% of security breaches.

The fact is that 80% of organizations have experienced a noticeable reduction in phishing susceptibility as a result of security awareness training—proof that it does indeed work.

2,000 Phishing simulations available in the SafeTitan MSP No limits pack.

# 69%

of SMBs would hold their MSP accountable at some level for a phishing breach.

# 90%

Of security professionals that experienced a breach said that better security awareness training for users would have helped minimize or prevent those breaches.

# 57%

Did you know that 57% of SMBs do not run a security awareness training program at all?
