

WebTitan Cloud for MSPs

DNS Filtering and DNS Security Layer for Managed Service Providers

WebTitan Cloud for MSPs is a cloud-based DNS web filtering solution, purpose-built to integrate seamlessly into a managed service provider's existing security stack. This multi-tenant solution offers comprehensive, real-time protection from online threats through advanced content filtering and virus protection.

WebTitan Cloud for Service Providers is flexible enough to meet your needs. It can be hosted in the managed service providers' environment or by TitanHQ in AWS, and can integrate easily with the service providers' existing systems via the API.

Trusted by over 3,000 MSPs globally for their web security needs, WebTitan DNS Filtering adds a highly robust layer of security to stop malicious activity from reaching the corporate network.

Why WebTitan?

- Margin-making capability for MSPs.
- WebTitan protects organizations from threats by managing their internet traffic. Malware and phishing are link killers for your customers.
- Real-time LIVE updating of malware and malicious threats.
- Active database of 650 million users driving the AI-driven protection.
- Ease of deployment, roll-out and use.
- No punitive terms or measures, no sharp practices.
- Full industry-leading support from IT pros.
- The power of reporting with full AzureAD integration.
- Easy filtering at multiple levels and the capability to recognize users in many different ways.
- Offers remote employee & student protection filtering for Windows, Mac, and Chromebooks.

WebTitan Features

Filtering

- Comprehensive set of predefined threat categories, with the ability to create custom categories.
- Threat categories are fully managed and updated using an AI-based classification engine and human quality assurance to categorize and validate content accurately.
- The classification engine provides Premium URL classification and best-in-class, market-leading accuracy and coverage, spanning more than 99% of the ActiveWeb.
- Customizable block page.
- Roaming agent for off-the-network filtering, suitable for remote employees and children on school devices.

Policies

- MSPs can define and customize a default policy so that on adding a customer, the specified policy is set to the customer's default policy.
- A filtering policy can be applied to a user, user group, location, and device.
- Use the system default policy or create your own custom policies.
- MSPs can implement global 'allow' and 'block' lists on all policies; customers inherit these.
- Per policy, Safe Search settings protect against explicit search results, including thumbnail images on Google, Bing, and YouTube videos.
- Active directory groups can be imported and have a policy applied.

Extensive APIs

- WebTitan Cloud offers a robust Rest API set with our dedicated infrastructure, allowing you to easily incorporate DNS filtering and customer onboarding directly into your existing cloud offering.
- A complete set of 'keys' and 'secrets' are readily available for WebTitan Cloud administrators.

User Identification

- Multiple user identification methods available, with support for both Microsoft Active Directory & Azure AD.
- User requests can be identified with Active Directory integration or WebTitan roaming agents to give better reporting and more granular control.

Easy to Setup & Configure

- 100% cloud-based, no software installation required.
- DNS-based solution that only requires a simple DNS redirect to your WebTitan Cloud server.
- Flexible deployment options: SaaS, dedicated infrastructure, and roaming agents for off-network protection.
- Easy navigation between customer accounts.

Off-Network Protection

- Off-network filtering and policy implementation are available using WebTitan OTG agents, with Windows, Mac, and Chromebooks support.
- Designed for the education sector, OTG2 for Chromebooks supports CIPA compliance and delivers user and device-level filtering, both on-site in the classroom and off-site at home.

Reporting

- Extensive set of predefined and fully customizable reports available.
- Real-time browsing view to assist with monitoring and troubleshooting.
- At-a-glance dashboard provides an overview of system performance and user activity.
- Enable email notifications to be informed when there is an attempt to access a blocked category.
- Schedule your reports to run periodically.
- Export reports.
- Syslog supported.

WebTitan Cloud for MSPs is cloud-based, multi-tenant, scalable, re-brandable, and designed for you!

WebTitan and our team of experts will help you achieve scale and recurring revenue.
